Hockey
PALLAS
DEGRA

Pallas have produced ice hockey equipment over 30 years . The most important thing about Pallas ice hockey equipment product development is to manufacture functional, well-protecting and light equipment, which has the right price quality ratio.

Players using Pallas equipment have won several Finnish and other national championships. The complete innovation in previous season 's inexpensive series will continue also with the Pro-series. The new Decra and F-series are even more dashing, functional and price competitive.

The Pattern-made products of the Pallas goalkeeper-line have had excellent feedback from both professional and junior goalkeepers, as have the more inexpensive Spyder-series. All equipment are manufactured according to the new IIHF standards.
